

## EC card sets 1-6

The card notes have been collected in six sets of around 200 card images each. Some of the cards contain written or typed notes on one side only, others are written on both sides.

In the image display, the command bar contains a list icon on the left, which shows the names of the individual files used to create the pages. These names give the country or topic of the card from its top right corner.

A file number followed by a or b indicates the front or back of the card. Cards written on one side have no a or b.

The Woolfnotes project plan is to sort the cards into more granular groups according to topics, but for the present we are making them all available in these sets.
